Classic

3rd Annual Production Sale
SEPTEMBER 25-26, 2020
NEXTGEN RANCH  |  PAXICO, KS

THE EVENING PRIOR JOIN US FOR THIS FEMALE FEATURE

Diamonds of the Flint Hills
30 Elite Beefmaster Females
Welcome to the 3rd Annual Flint Hills Classic

Welcome! Once again we gather at NextGen Ranch for our 3rd Annual Flint Hills Classic Bull Sale. Nestled in the vibrant Flint Hills of eastern Kansas, this region is the epicenter of the US beef backgrounding sector of the cattle industry.

NextGen is a team of people passionate about the cattle business. Our team continues to grow and cultivate relationships in every sector of the beef industry. NextGen Cattle Feeding in Allen, KS (12,000 head Backgrounding Facility equipped with GrowSafe feed efficiency testing), NextGen Cattle Feeding at Riverbend (47,000 head one time capacity Finish Feedyard located in Hugoton, KS and close proximity to multiple packing plants,) NextGen Trading (offering commodities and feed procurement all across the US) and of course NextGen Cattle Co Ranch, the home to our Beefmaster and Charolais seedstock operation as well as our commercial herd.

At our core, NextGen is a genetic company. You could say that we backed into the seedstock business, to fill some voids that in our own experience needed to be addressed... most notably, maternal heterosis and terminal crossbreeding, the two largest and underutilized revenue points available to the everyday rancher. We believe the industry and our customers, can best capitalize on the powerful nature of heterosis by utilizing a planned crossbreeding program based on the inherited traits we've selected for. Few offerings will include as many bulls excelling in carcass and growth traits while at the same time offering strong maternal excellence as well. Utilization of EPDs, performance data and scanning information ensure that we offer bulls that you can bank on. Early on, the team realized the profitability of value added genetics in terms of cattle health, live performance, feed efficiency, cost of gain and carcass merit. If we're going to own cattle, why not own cattle that have known genetics? This concept not only creates efficiency, it serves as its own form of risk management. We believe that our profitability should intertwine with our customers, so we created the Bull Buyer Guarantee “B2G”. We will offer a premium over market for calves sired by NextGen Cattle Company or Flint Hills Classic Cooperators.

We feel as you review the genetic offering in the Flint Hills Classic, you will find that we are committed to offering bulls that will sire calves that will hang profitably on the rail, and they will produce the kind of females that will have fertility and longevity that is essential for our customers. We are proud to have partners in the Flint Hills Classic that share these same visions. This is clearly evidenced by the number of Beefmaster lots that not only rank in the top 20% or higher for $T but also rank in the top 20% for $M. The Bulls offered in the Flint Hill’s Classic have all been raised together in the same elements and environment since they were weaned.

We are honored to host you at our Ranch. Please feel free to contact our team for details.

This sale will be broadcast live on the internet.

DVAuction

Real time bidding & proxy bidding available.
**Sale Guarantee**

The seller guarantees to the buyer that: 1) the pedigree, performance data and genetic information, as represented in any sales materials (including sale catalog, supplemental sheet or sale day announcement), are accurate; and, 2) all information from the BBU database is accompanied by an accurately stated “as of” date. The seller guarantees that all animals are breeders. Bulls eighteen (18) months or older are guaranteed by the seller to have passed a Breeding Soundness Evaluation (BSE) and to have been certified a satisfactory potential breeder by a licensed veterinarian within forty-five (45) days prior to sale date. Results of the BSE must be reported on a fully completed official form and attached to the health papers required for the sale. If within one-hundred twenty (120) days from the date of sale, the bull has failed to pass a BSE certified by a licensed veterinarian, buyer must send seller written notification of the failure of the test within one-hundred and twenty (120) days from the date of sale and include the BSE test results. Within sixty (60) days after sellers notification of the failed BSE test, buyer and seller shall identify a mutually agreeable licensed veterinarian or technician certified by a licensed veterinarian to perform another BSE on the bull at the buyer’s expense. The results of the test shall be deemed final and conclusive of this matter and binding on buyer and seller. If, in the opinion of said veterinarian or technician, the bull is unable to pass a BSE and be confirmed a satisfactory potential breeder, he shall so certify in writing to the seller and the buyer which shall include the official form used by the Society of Theriogenology or the official BBU BSE form. In such event the buyer may return the bull to the farm of seller, provided the bull is in good condition and in compliance with the health requirements of the seller’s state, for a refund of the full purchase price. The acceptance of the refund of the full purchase price shall in any case be deemed full satisfaction and settlement of the matter. The seller and buyer shall bear equally all reasonable and necessary transportation expenses that are incurred in returning the animal to seller. Unless otherwise agreed by the buyer and the seller, the seller makes no guarantees with respect to the ability to freeze semen.

**Terms & Conditions**

Each animal will be sold to the highest bidder without reserve. The Auctioneer in charge will settle any dispute as to bids, and his decision on such matters shall be final. All sales are for cash unless satisfactory credit arrangements, including any possible reservation of security interest by the seller, have been made with the seller prior to sale. The risk of loss and injury of each animal passes to the buyer as soon as it is sold. A transferred certificate of registration must be furnished by the seller free of charge to the buyer for each animal within forty-five (45) days following the later of either the date of sale or upon the receipt of full payment. Unless otherwise announced, the seller guarantees that all animals are eligible for interstate shipment as required by applicable federal and state regulations.

**B2 Guarantee**

The B2 (Bull Buyer) GUARANTEE is a calf buy back program designed to give our bull buyers a premium calf market for trusting in our genetics.

**Requirements:**
- Calves must be sired by NextGen or Flint Hills Classic Bulls
- Calves must be inspected by an agent of NextGen or Flint Hills Classic prior to shipment
- Calves must be weaned a minimum of 45 days prior to shipment
- Calves must be castrated and healed (bull calves)
- Calves must have vaccination records in accordance with NG Vac 45 protocol

**The Process:**

When a B2 has calves to be considered, they must contact an agent of NextGen or FH Classic to set up a time for a ranch visit. The ranch visit will be the initial process in ensuring all of the requirements have been met as outlined above and on the NG Vac 45 protocol sheet. This also will serve as the initial process of lining out pricing/shipping/scales, etc. Once the initial visit and inspection of the cattle is complete the calves will be eligible and the pricing and final details can be finished via email/phone etc.

**B2 Guarantee Goal:**

The goal of this program is to give our Bull Buyers the confidence in our genetics and our program. The calves purchased through this program will all be fed and finished at our feedyard in Kansas. The carcass data and merit information will be available to the seller for future evaluation when the calves are complete. So trust in the B2 Guarantee, and let our team show what we can do for you!

**NG Vac 45 – (NextGen Value Added Calf protocol)**

All calves must be minimum 45 days weaned. Bull calves must be castrated and healed. Calves must be dehorned and healed. Birth dates must be recorded and a visual tag present at the time of inspection. Calves must also follow one of 2 protocols for vaccinations.

Red, 3/4 blood Advancer bull sired by BBU poster boy Rydin Dirty, 19/149 earns high maternal marks with his top 5% WW EPD ranking combined with his top 10% SC and MWW. These numbers help him earn his impressive top 5% maternal index ranking. As a 3/4 blood Advancer bull, this bull can be used on purebred Beefmaster females. He will sire purebred Beefmaster progeny, with the advantage of pulling in total outcross genetics. This is a very advantageous option many astute breeders are using to add outcross genetics to the maternal base of their programs.

This athletic, big hipped, big boned bull sports a 42 pound BW to YW EPD spread. He carries a very impressive top $M ranking at 5% so if you’re looking for a red, flashy low birth weight, highly maternal bull to turn your program around, here he is.

**CONSIGNED BY: BOUNDS SWINGING B RANCH**
Big growth bull with top tier growth EPDs ranking in the top 15% for both WW and YW which contributes to his top 10% $T ranking. This Dream Catcher descendant includes long-time milk trait leader Catalyst.

**CONSIGNED BY:** HARGIS RANCH

---

This flashy, wide based and sound bull is a low BW, calving ease specialist with lots of carcass merit. 463G earns top 1% rankings for both BW and CED but rest assured there's still plenty of growth punch with WW ranking 25% and YW top 20%. He perfectly balances his economic indices by earning a top 15% $T and top 20% $M rankings.

**CONSIGNED BY:** CAIN CATTLE COMPANY

---

More than just a solid performer, as you study his EPD profile you will be blown away. He ranks in the top 4% MB; 10% for CED, REA, $T and top 15% of the breed for BW, WW, YW, and $M. This is the kind that keeps it going across the board.

**CONSIGNED BY:** CAIN CATTLE COMPANY

---

This smooth made but wide based Genesis son balances maternal and carcass merit, both in EPD standing and actual scan data. 1025 was the top-ranking bull in his contemporary group with his 2.84 IMF scan and was the top ranking bull for REA. He is superbly balanced in his EPDs across the board and will produce the daughters you won’t part with.

**CONSIGNED BY:** HIATT DIAMOND H

---

Take a look at this black, low birth weight son of Smokin Hot, coming from a proven, no nonsense forage-based program. 494 has a good growth spread while balancing realistic marbling capabilities with his #2 ranking within his contemporary group for IMF. 494 has a good growth spread while balancing realistic marbling capabilities with his #2 ranking within his contemporary group for IMF.

  - REA: 11.79

**Performance:**

- BW: 71.95
- WW: 636.11
- YW: 832.10
- REA: 10.99
- IMF: 1.93
- RUMFAT: 0.16

**Summary:**

Red and correct, this smooth made New Dimension son is heavy laden with maternal traits! A top 15% WW EPD ranking as well as a top 1510 MWW EPD ranking contributes to him achieving an impressive top 10% $M index ranking.

**Consigned by:** Bounds Swinging B Ranch

---

Cj's Love Maker -- Sire of Lot 70

**Bull Description:**

- **Breed:** Black
- **ID:** 1904
- **Sire:** CJ's Love Maker
- **Dam:** CJ's Black Oasis
- **Pedigree Highlights:**
  - Sperm Production: 53.3 pounds BW to YW EPD spread
  - $M Ranking: Top 10%
  - $T Ranking: Top 8%
  - IMF: 2.14
  - REA: 11.79

**Performance:**

- BW: 72.11
- WW: 591.15
- YW: 873.95
- REA: 11.98
- IMF: 1.93
- RUMFAT: 0.18

**Summary:**

Polled, black and phenotypically pleasing, this Dream On son has a totally dominant genetic profile. Beginning with his explosive growth numbers, ranking in the top 1% of the breed for both WW and YW, and moving on to massive 85.5 pound BW to YW EPD spread with no shortage of maternal power. Finding bulls with this much power and still maintaining top 1% $M rankings is no easy feat!

$T. If you’re taking advantage of a grid marketing system this bull should fit the bill!

Channarock 812 posts a hefty BW to YW EPD spread and earns a top 4% ranking in maternal worth. This Black and polled with growth to spare, this Channarock bull still exhibits impressive modest BW EPD. He may have the highest BW to YW EPD spread in the sale. Can’t go wrong if you take this bull home! Red and stout, this EMS High Profile son stacks in plenty of growth and muscle. Highest ranking possible for $T and still maintains a Wide bodied, deep bodied big topped, big boned McAlester son with curve bending EPD Rankings! Top 1% rankings for WW, YW, WWMT, SC and REA EPDs in a package that is bred to stay with you for a long time. Not only will he build performance in your herd, he will leave an extra-large maternal footprint with his top 1% ST and $M rankings.

Red, low birth weight, Game Changer son out of a linebred L2 Captain Sugar cow. 1929 posts a low calving ease EPD, highly maternal profile with an excellent IMF scan.

CONSIGNED BY: JONES BEEFMASTERS
Highly sought after McAlester son with a wide base and muscle and bone to spare! This prospect has a balanced EPD profile as you would expect, and his scans support the EPD expectations. Take him home and enjoy the change he will make in your program. Create efficiency in your program and provide marketing stability for both sides of your calf crop!

CONSIGNED BY: CHANNAROCK FARM

Fancy and sleek, this red and polled Love Maker son sports a low birth weight with top 10% or better rankings for 5 separate EPD categories.

CONSIGNED BY: JONES BEEFMASTERS

Red, wide bodied Sugar Britches son out of a really productive Dream Catcher daughter. This bull hails from a herd well acclimated to fescue country and should produce progeny that can survive anywhere.

CONSIGNED BY: HIATT DIAMOND H

Red, low birth weight with an appealing big spread with outlier maternal strength. His 50.3 BW to YW EPD spread is impressive but when coupled with his top 20% $M you have optimized growth while greatly embellishing your herd’s ability to produce high productive replacement heifers.

Here’s a bull that’s sure to sire plenty of look in his calves while keeping a moderate frame. Expect this Honey Badger son, ranking in the top 3% for $M, to sire low birth weight calves that are correct and free moving. The Lyssy herd has long been known for producing functional, eye appealing cattle.

CONSIGNED BY: LYSSY BEEFMASTERS
RED, big spread Pinnacle son. As for maternal, 98/945 earns a top 10% stay EPD ranking and stands in the top 20% for the maternal index. Make a solid investment in your cowherd.

CONSIGNED BY: LYSSY BEEFMASTERS & SONS

You won’t find many own sons of Genesis anymore, so when you see a double bred grandson, pay attention! This polled bull sports the impressive ability to post a negative BW and top 10% WW EPD, giving him a $M in the top 2% of the breed. When you check his carcass traits, you are sure to notice he posted a 4.8% IMF scan that supports his IMF EPD being in the top 15 percent of the breed!

CONSIGNED BY: CHANNAROCK FARM

This fancy, red, maternal outlier tops the rankings at 10% WW, 15% MWWT and 15% STAY EPD rankings! Consolidate into his impressive top 5% maternal index ranking and you can bet that 98/947’s daughters will be fertile, long lived and inject pounds into your pay weights!

CONSIGNED BY: LYSSY BEEFMASTERS

When you combine the maternal attributes of the famed 509 cow and Triple Threat you get incredible results. This curve bending Lovemaker son packs a major punch when you see a negative BW EPD to a WW of over 50! It doesn’t stop with the growth pattern in this one, he reads out single digit rankings for MWWT and SC with a most impressive 41.37 $M. This is the kind that will put your herd on the map with progeny that are second to none!

It doesn't take much time studying this bull to realize why we have built our program around McAlester. This time out of the great Belle donor from Diamond H, we have high expectations for this young herd sire. He compiles power, dimension, functionality and a most impressive data set! When you put huge scans like his on the board they stand out with a 13 inch REA and a 122 IMF ratio, it's no wonder he is in the top one percent of the breed for ST. This is a sleep easy calving bull that will pack on the pounds to any calf crop as he posts an incredible 83.2 lbs spread from BW to YW and backs it up with a MWWT and $M EPDs in the top few percentiles of the breed. HDH Doughboy is going places, wouldn't you want your herd to go in the same direction too?

Homozygous Black and Polled. We have seen Game Changer progeny bend the curve and set trends over and over but rarely do we see one quite like him. When you demand a calf crop that compiles style, balance, unique design, and time-tested predictability you demand bulls like 1857. Not only does he have the physical attributes of a breed legend, but you also have to consider that he would be a trait leader for both $T and $M with his first set of progeny on the ground. That isn’t an easy feat however, he has the unique ability to cover a BW to WW spread of 73lbs and over 100lbs from BW to YW! The genetic makeup of this phenom is second to none and he has the ability to expand the footprint of the entire breed in the right hands. This is a serious herd sire for a serious operation.

CONSIGNED BY: JONES BEEFMASTERS

Lot 137

We keep seeing impressive data sets with breed leading EPD profiles in this offering and we are prod of that. It is hard to make decisions when you have so many great opportunities in front of you. Therefore we hope that we can continue offering these great bulls so that every operation has the ability to improve their bottom line. With a negative BW and top 1% WW EPDs you will exceed the weaning weights you require. With breed leading MWWT and SC, his daughters will wean and breed back in pace with your most productive cows. With the carcass EPDs he possesses, he will sire progeny that hang on a rail with the best. And being in the top 1% for both $T and $M, he will catapult your genetic potential. This is the kind that turns the tide for operations.

CONSIGNED BY: JONES BEEFMASTERS

LT Badge was the standout favorite at the 2020 Lindskov-Thiel Annual Bull Sale where he commanded a staggering $105,000 when the bidding ceased. In just a brief afternoon, Badge had captured the interest of seedstock and commercial producers alike across the U.S., Canada and the world.

Long bodied, stout-made yet smooth and stylish, LT Badge brings the look cattlemen seek. He packs an impressive pedigree sired by the $160,000 outcross calving ease leader, LT Authority and out of a second-calf LT Patriot daughter. Pair this with his performance driven EPD profile – Top 7% WW, YW and Top 10% Terminal Sire Index (TSI), Badge offers a total package for cattlemen of all stages of production. Come see Badge on sale day to see for yourself what he can do for you.

NextGen Cattle Co along with their partners have decided to offer you the opportunity to get in on the ground floor. With the purchase of a semen package, you will receive 10 straws of semen and 10 signings. These 200 units of semen represent all the semen that will be sold this year.

One of our most unique offerings this year! As you study his design, it's no wonder that his dam is one of our favorites here at NextGen. Long as a freight train, sound as a whistle, 0999G stands out. Not only does he hold single digit rankings for BW and CE, but he also proves to be a phenomenal carcass bull with a 17 inch REA and MARB being in the top quarter of the breed! Bulls like this don't come around very often. Whether you're looking to take the next step in your breeding program or your looking to produce the best walking bulls in the country, 099G will be your greatest asset!

CONSIGNED BY: NEXTGEN CATTLE CO

Moderate birth weight, high growth and even higher marbling; that's what 9003 brings to the table. With a 63 lbs BW to YW spread, it's sires like this that make any terminal program work. No matter how you market your calf crop, this is the type that helps make your program profitable!

CONSIGNED BY: FLUHARTY FARMS

You'll find a unique package in this polled bull. Bolstering accelerated growth to weaning and a great BW to YW spread, this guy will pack on the pounds! He managed to throw a huge scan with a 15-inch REA and a 4% IMF, while staying well under a quarter inch of rib fat. This bull doesn't just give you the weight advantage, you'll be more than pleased with the retail product!

516G brings a lot of function to the table. However, he truly excels in MARB. Ranking in the top 15% of the breed for MARB, we expect to see his progeny do more than just yield on the rail, we expect them to produce the quality carcass that our consumers demand. This polled bull will do more than just put on the pounds!

This yearling heifer is quite a masterpiece. When you combine the volume, stature, and performance that Mac has to offer with the style, femininity, and balance of this great Diamond of Soul daughter, you get great things. She brings a curve bending EPD profile to the table starting with a negative BW and jumping straight to a WW in the top 5% of the breed. We know that these Mac daughters bring the highest amount of capacity on a moderate frame. They consistently mature into those efficient cows that breed on time and wean the heaviest calves in the pasture. This great female backs that up with maternal rankings of 4% for SC, 10% for MWWT, and an impressive 2% for $M. This female proves that you can have it all!

We got to see the demand for this mating firsthand in Houston this spring. We were proud to offer this mating in a bull and open heifer and were blown away by the response. On both sides of the equation, this is the kind that works! Bringing incredibly low BW with top 2% CE, and 15% MCE she will produce those true calving ease progeny. She follows that easy calving with balanced growth and outstanding carcass traits, with REA in the top 10% of the breed and MARB in the top quarter. All of this with high marks for SC and STAY, puts her in the top 30% of the breed for both $T and $M. We know what these genetics have done for us and we are proud of what she will do in your donor pasture.
Love Maker has left a mark on this breed that is very easy to see. This is a mating that has produced the consistency that the breed has been searching for with performance that our partners demand. A 39.25 $M EPD is not easy to obtain, in this case it takes being in the top 4% for WW, MWWT and SC, with STAY in the top quarter of the breed. She does this with the easy calving we have been building into our herd. When you combine this level of performance with a classic silhouette you know it has to be a good thing. When you add the fact that she is polled and homozygous black, you begin to see the possibilities of a greatly expanded marketplace.

It's not easy to pick through these flushmates and we appreciate how difficult that really is. We also understand that some operations prefer a one coat color to the other, so in this pick we offered both. This red, polled Love Maker daughter does some incredible things for any program. With top end growth traits in the top 5% for WW and 15% for YW, she maintains the ever important MWWT in the top 10% of the breed. When you combine those attributes, you post a massive 35.39 $M. We all know the impact the great Diamond of Soul cow has had on this breed, so when you stack her twice in a mating with Dream Catcher, you know exactly what you are getting: low maintenance females, that out pace their contemporaries, and will do so for years to come. We've done the easy part by providing these females, it's up to you to make a hard decision, red or black.

**Lot 3b**

**NG MS GAME CHANGER 1702G7**

You just don’t see any slackers out of the Flint Hills Diamond cow. This Game Changer daughter is something special and she knows it – earning honors at the 2020 Junior Beefmaster National Show. She packs a major punch as she ranks in the very top percentile for WW, YW, MWWT, SC, $T and $M. She does this all while having the ability to produce those easy calving progeny in the top 10% for CE and BW. She backs up those percentiles by posting a WW ratio of 116, not an easy feat in this operation. For those looking to make bulls for the retained owner, rest easy with her 0.26 MARB EPD, it ranks her in the top 4% of the breed. Here’s to having it all in a homozygous polled and homozygous black female!!

**Lot 3b**

Being in multiple segments of the industry, we understand what is truly important to our partners. We take pride in removing the guess work to your breeding program. We know the predictability of these Flint Hills Diamond progeny and we know how well they perform. This homozygous polled Game Changer mating posts rankings in the very top percentile for multiple traits including: WW, YW, MWWT, SC, $T and $M. She’s already backing that up with an impressive 111 WW ratio, and a 71 lbs BW that maintains her top 20% CE and BW percentile rankings. It’s no easy feat to post index ratings of $158 for $T and especially a $43.39 $M. With that being said, it doesn’t happen by accident either, these genetics are consistently high performers, just check out the bull siblings in the sale.
This is the very first female offering from the Hurla’s. Building around years of experience in multiple industry segments, they understand the importance of high performing genetics. This daughter of the up and coming Sure Fire bull represents the future direction of their operation. A stunning design, a top shelf pedigree, and predictable performance. She easily ranks in the top 10% of the breed for seven traits. She balances those highly maternal attributes with the carcass traits they expect from years of feeding their own genetics. We expect great things from this young female, and you can too!

Swinging B is known for producing some of the best genetics in Texas. This maternal granddaughter of Dream Catcher and the great 531 cow will do great things for any operation! This is a balanced trait female with the structural integrity their program demands. She ranks in the top 20% or better in multiple traits including: WW, YW, MWW, $T and $M! This female will certainly add performance to your genetic base, we just can’t wait to see the impact she leaves in your herd.
Rhiannon rings like a bell through the night…” Homozygous Black and Polled with true balance and bone, you won’t find a hole in this one. An own daughter of Bernard and our Schneider donor, Rhiannon is backed by generations of performance and superior conformation. Rhiannon is the type and kind that can put your operation on the map or elevate the level of your donor program.

Maternal sister to Rhiannon, Planned Perfection is one of our favorite Mac daughters to date! Volume, bone, femininity, and sheer presence makes this smooth polled heifer one of our absolute best! As you study her structural correctness coupled with pure performance, you can almost certainly plan on breeding perfection at home.
These Mac daughters are absolute standouts! We’ve seen the demand for his progeny over the last few years and it is no surprise that his daughters are as great as his sons. We know the quality that comes out of the Diamond H program and it is very evident in 330G. Ranking in the top quarter of the entire breed is not easy, but she does it repeatedly in WW, YW, MWWT, SC, REA, $T and $M. She’s bred to an own son of the great Belle donor who has produced some of the best bulls to walk through our development program here. We know what happens when you put together genetics like this!

Center stage is a fascinating outcross for any operation! Combining genetics of the popular Sugar Britches bull with the stand-out performance of Doc, it’s no wonder she ranks so highly in so many traits. With CE and BW in the top 35% that jump to the top 20 and 15 percent mark for WW and YW the buck doesn’t stop there. This donor is bred to our exciting Fireball bull! He’s backed by some of the best genetics in the breed like Ring of Fire and Eye Candy. If that isn’t a strong enough indication of what that mating will do just think about him posting single digit percentiles in 10 different traits, including a $M of $50! We are excited to see how she steps up the performance of your program!
This black, polled Dr. Love cow is just now hitting her prime. She’s already bred back to Sure Fire, and as you can see, she simply doesn’t miss!

What a Pair! This Game On heifer is something truly special. With genetics like this we get spoiled just having them around. She is already backing up those single digit percentiles (CE, WW, YW, MWWT, SC, $T and $M) by already posting a massive 123 ratio for her 205-day weight! We expect her to continue setting the pace in any program she enters!

Consigned by: JONES BEEFMASTERS
The 1505 cow has done a great job for us, we know when they are built right you can build a program around them. She happens to be bred back to Sure Fire, an incredible package for your program!

Another incredible Game On Daughter on the side of such a unique cow! This young heifer is already making tracks as she posted a ratio of 112 for her 205-day weight and bends a huge cure from BW to WW and beyond. If you want more than just ground pounding growth, check out her maternal and carcass attributes, it's all there with extremely high $T and $M!
The 1849 Black Ruby donor has done amazing things for our program and we know what these females will do for you. If you spend anytime checking performance values throughout this catalog, these sons and daughters just plain do it. They consistently post single digit percentiles for growth traits and index values. This daughter in particular scanned a massive 12.9 inch REA with a 4.44% IMF, which backs up her massive 1.22 REA EPD! Predictability is a challenge to obtain for many, this is the kind that can breed it into your herd.

This is not an easy choice between these two flush mates. Both have incredible EPD profiles that stand toe to toe with anything out there. This heifer ranks among the absolute best on growth traits. Her BW to WW spread is in excess of 63lbs, supported by a ratio of 120. The same spread to yearling is over 95lbs with a ratio over 110. She scanned over a 4.6% IMF and has a REA EPD of 1.14. Her index values are well into the very top percent of the breed. This is no small feat and both of these females get it done. These genetics are leading the breed to new heights, here is a golden opportunity to grow with them!
This may be one of the most unique matings in the entire breed, a Mac daughter out of Eye Candy’s full sister. She covers a huge spread from a top 10% CE and BW to a 1% WW and YW. She posts top tier carcass traits of a 0.98 REA and top 15% MARB EPDs, backed by a 4.71% IMF scan. Looking into her index values, you will see her incredible $T of $154.91 and $M of over $45! Quite a challenge as she also adds the dimension, design, and broodiness to make an impact.

One of the most exciting heifers to walk these hills, 28G4 is paramount to the direction of this breed. An own daughter of Love Maker and a full sister to Eye Candy, you won’t find many as good as these. She has the ability to post single digit percentiles in nine, yes nine different traits! The efficiency of this genetic phenom packs on the pounds and gives you the end result of a moderate, perfect skeleton. We were blown away by her 6.2% IMF scan, which backs up her MARB EPD rank in the top 3%. When you combine this all of this in a polled heifer that’s open for an immediate mating, you open the door to endless possibilities!
We have been able to see how well Reliant has worked for our friends at Cain over the years. Generation after generation, they make phenomenal cows that hustle! This polled heifer will do the same for you. Whether you need to bring in more growth or carcass traits to your herd, she will get it done. We are very confident in her ability to step up your program with some of the best maternal characteristics in the breed. With balanced EPD profile that includes being in the top 10% for STAY and single digit ranking for REA, she will impact your herd for years to come!

We have seen how well Mac works on Diamond of Soul daughters and this is no exception. Every set of scan data we receive just goes to prove how phenomenal these genetics perform. It is certainly impressive to see a heifer scan a 12.45 inch REA with a 5.19% IMF so it’s no surprise that she boasts superb carcass trait EPDs. We know the value of these genetics as they translate throughout the industry sectors, that’s why we are so proud of genetics that work this hard!
As you study the genetic offering here, you have to take notice of how well Mac works with so many type and kind females. This polled heifer is the epitome of outcross genetics. She brings together a Jones and Channarock cow base, then utilizes a soon to be breed legend. You can expect a rest easy calving season, scale smashing performance, and impressive scan data. She certainly has the maternal advantage with a $M of over $38, and will provide returns with a huge 3% $T. This is the kind that changes herds!

Lot 17

One of the highest performing females in the offering, 98G packs on the pounds. She ranks with single digit percentiles in nine traits, with MARB still being in the top quarter of the breed! Her massive WW EPD is supported by a ratio of 112, and she scanned an incredible 12.66 inch REA with 4.45% IMF! You don’t see that very often in a set of females, but she isn’t alone. 98G and the rest of this female offering stand second to none. You can see it on the hoof, you can see it in the performance data, you will see it in your herd too!
The CJ 860 cow has produced some of the most prolific sons in the breed like Crown Royal, Cattin Around is no exception! This black hided female possesses a balanced trait EPD profile and covers all the bases with a negative BW to top 10% growth traits. She does just the same with MWWT, SC, and a high STAY. All of this makes it possible to rank in the top 10% for $T and $M. We are confident this female will bring value into your program!

A half sib to the previous lot, this female brings the top shelf design you desire with a balanced trait EPD profile. She ranks in the top quarter of the breed for growth traits, STAY, and MARB. Solid standing index values hold true to this female's future!
**Lot 21a**

The 1849 cow family will forever impact the genetics at NextGen. The predictable quality they possess is showcased in this polled, black female. She highlights a sleek design that isn’t a let down when you step behind her. She does an exceptional job of combining performance with a perfect skeleton. An intriguing note about this pick is that they are both bred to the high-octane sire, CJ’s Revolution. There aren’t going to be many opportunities to inject Revolution in your herd, let alone through a female like this.

Consigned by: **NEXTGEN CATTLE CO**

**Lot 21b**

We love to see what others think through these heifer picks. We know that the 1849 cow family sets the highest of standards. We know how Mac is impacting the breed, and we know that it takes the very best to elevate your herd. already stands in the top ten percent of the breed for nine traits. What more could you ask for? Well, she is polled and is bred to Revolution!

Here is another example of how well Mac works on so many genetic bases. This heifer has the unique ability to stand in the top quarter of the breed for 11 different traits, with seven of those being in the single digits! It can be challenging to mate a female like this to a bull that won’t pull back the throttle, so we made sure to breed her to Revolution! He was syndicated last year, and his first calf crop is nothing short of impressive!

If you ever have the chance to own a daughter of the famed Belle cow, don’t miss it. Her brothers have consistently held a place at the top end of our sale offering every year. They perform with every contemporary group, they stand out with the correct phenotype, and they produce only the best. This balanced trait female is bred to the homozygous Black and Polled Bernard! He has progeny in this outstanding group of females, and Belle has several sons in the top of our bull sale. Check them out!

Bred Heifers

Genesis is known for producing some of the best mature cows in the breed, so we tried this one with Mac. The results are easy on the eyes and perform like a dream. This polled heifer has the ability to rank in the top quarter of the breed for 10 traits, with most of them in the single digit range (WW, YW, MWWT, SC, REA, ST and $M). This female is going to make a great cow with her first calf being sired by Lights Out, a Homozygous Black and Polled bull! We have had great results with matings identical to this, we know how great it works.

These Maverick daughters are simply incredible. Timeless style, efficient maternal capabilities and performance that work well in any operation are qualities they bring to the table. This was a flush we made with Genesis, and we are excited about the results. She ranks in the top quarter of the breed for 13 traits! Some of those are in the top 10% being: WW, YW, MWWT, SC, STAY, ST and $M. To sum it up, these genetics perform on the highest level. For more evidence, check out her individual data, she backs up high EPD rankings with high ratios. More importantly she does it with a great design, structural soundness, and happens to be bred to Pinnacle!
